

Gentlemen,

It is my understanding that you want to use the 425 and 435 MHz band for the use of Part 15 RF identification devices. Please be advised, that I am TOTALLY AGAINST the use of ANY type of RF Device other than that of a Amateur Radio Station. I ask that to remove this perposal and stop typing to auction off our Amateur Radio Frequencies! The 425 and 435 Mhz is a Amateur Radio Frequency and Should remain so...As you see, The ARRL has argued that under the Communications Act of 1934 the

FCC lacks authority to permit unlicensed devices with substantial interference potential and that such devices must be licensed. The ARRL also is looking into the interference potential posed to 20 meters by a proposal to increase the maximum emission levels permitted by Part 15 devices operating at 13.56 MHz, as well as the maximum level of out-of-band emissions.

So, In short, I am Against the use of our frequencies for any OTHER service.

Thanks,

-Charles P. Adkins K8CPA
